

Basel III - Pillar 3 Disclosures as on June 30th, 2025

Table DF-2-Capital Adequacy

Qualitative Disclosures

A summary discussion of the Bank's approach to assessing the adequacy of its capital to support current and future activities.

The Bank is following standardized approach, Standardized Duration approach and Basic Indicator approach for measurement of capital charge in respect of credit risk, market risk and operational risk respectively.

The computation of Capital for credit risk under Standardized Approach is done granularly borrower & account wise based on the data captured through Core Banking Solution. Bank is also taking efforts on an ongoing basis for the accuracy of the data. The various aspects of Basel III Capital Regulation norms are imparted to field level staff regularly through circulars and letters for continuous purification of data and to ensure accurate computation of Risk Weight and Capital Charge. The Bank has used the credit risk mitigation in computation of capital for credit risk, as prescribed in the RBI guidelines under Standardized Approach.

The capital for credit risk on Loans and Advances, market risk and operational risk as per the prescribed approaches are being computed at the bank's Head Office and aggregated to arrive at the position of bank's Capital to Risk weighted Assets Ratio (CRAR). The bank has followed the RBI guidelines in force, to arrive at the eligible capital funds, for computing CRAR.

Besides computing CRAR under the Pillar I requirement, the Bank also periodically undertakes stress testing in various risk areas to assess the impact of stressed scenario or plausible events on asset quality, liquidity, profitability and capital adequacy.

The bank conducts Internal Capital Adequacy Assessment Process (ICAAP) on an annual basis to assess the sufficiency of its capital funds to cover the risks specified under Pillar- II of Basel guidelines. The adequacy of Bank's capital funds to meet the future business growth is also assessed in the ICAAP document, which is approved by the Board. While the surplus CRAR available at present acts as a buffer to support the future activities, the headroom available for the bank for mobilizing Tier 1 and Tier 2 capital (subject to approval by the competent authorities) is also assessed to meet the required CRAR against future activities.

The Bank is having high quality Common Equity Tier 1 capital, as the entire components of CET1 capital comprises of Paid up Capital, Reserves & Surplus and retained earnings.

Minimum capital requirements under Basel-III:

Under the Basel III Capital Regulations, Banks are required to maintain a minimum Pillar 1 Capital (Tier-I + Tier-II) to Risk-weighted Assets Ratio (CRAR) of 9% on an on-going basis. Besides this minimum capital requirement, Basel III also provides for creation of Capital Conservation Buffer (CCB). The CCB requirements were implemented from 31st March 2016 in phases and final tranche 0.625% was fully implemented from October 1, 2021 to the extent of 2.50% (total CCB) of Risk Weighted Assets.

The total regulatory capital funds under Basel-III norms consist of the sum of the following categories and banks are required to maintain 11.50% of Risk Weighted Assets (9% + 2.50%) from October 2021.

- Tier 1 Capital comprises of:-
 - Common Equity Tier 1 capital (with a minimum of 5.50%)
 - Additional Tier 1 capital (1.50%)
 - Total Tier 1 capital of minimum 7%
- Tier 2 Capital (2%)
 - Total Tier 1 + Tier 2 should be more than 9%
- Capital Conservation Buffer (CCB) (with a minimum of 2.50%)
 - Total capital including CCB should be 11.50%

In line with the RBI guidelines for implementing the New Capital Adequacy Framework under Basel III, the bank has successfully migrated to Basel III since April 01, 2013.

2. Risk exposure and Assessment

Risk is an integral part of banking business in an ever dynamic environment, which is undergoing radical changes both on the technology front and product offerings. The main risks faced by the bank are credit risk, market risk and operational risk. The bank aims to achieve an optimum balance between risk and return to maximize shareholder value. The relevant information on the various categories of risks faced by the bank is given in the ensuing sections. This information is intended to give market participants a better idea on the risk profile and risk management practices of the bank.

The Bank has a comprehensive risk management system in order to address various risks and has set up an Integrated Risk Management Department (RMD), which is independent of operational departments. Bank has a Risk Management Committee of Board functioning at apex level for formulating, implementing and reviewing bank's risk management measures pertaining to credit, market and operational risks. Apart

from the Risk Management Committee of the Board at apex level, the Bank has a strong Bank-wide risk management structure comprising of Credit Risk Management Committee of Executives (CRMCE), Operational Risk Management Committee of Executives (ORMCE) and Asset Liability Management Committee (ALCO) at senior management level.

The Bank has formulated the required policies such as Loan Policy, Credit Risk Management Policy, Credit Risk Mitigation Techniques & Collateral Management Policy, Integrated Risk Management Policy, ALM Policy, Operational Risk Management Policy, Investment Policy, Foreign Exchange Risk Management Policy, Policy guidelines for Hedging Foreign Currency Exposure, Market Risk Management Policy, Concurrent Audit Policy, Inspection Policy, IS Audit Policy, KYC policy, Credit Monitoring Policy, Stock Audit Policy, Outsourcing Policy, IT Business Continuity and Disaster Recovery Plan (IT BC-DRP), Risk Based Internal Audit Policy, Stress Testing Policy, Disclosure Policy, ICAAP Policy, Model Risk Policy etc., for mitigating the risks in various areas and monitoring the same. The bank continues to focus on refining and improving its risk measurement and management systems.

Table DF-3- CREDIT RISK: GENERAL DISCLOSURES

Qualitative Disclosures:

a. Credit Risk

Credit risk is the possibility of losses associated with diminution in the credit quality of borrowers or counter-parties. In a Bank's portfolio, Credit Risk arises mostly from lending activities of the Bank, as a borrower is unable to meet his financial obligations to the lender. It emanates from potential changes in the credit quality / worthiness of the borrowers or counter-parties.

Credit Rating & Appraisal Process

The Bank has well-structured internal credit rating framework and well-established standardized credit appraisal / approval processes. Credit Rating is a decision-enabling tool that helps the bank to take a view on acceptability or otherwise of any credit proposal. In order to widen the scope and coverage further and to strengthen the credit risk management practices, the bank has developed risk sensitive in-house rating models.

The parameters in internal rating take into consideration, the quantitative and qualitative issues relating to management risk, business risk, industry risk, financial risk, credit discipline and also risk mitigation, based on the collaterals available.

Credit rating, as a concept, has been well internalized within the Bank. The rating of eligible borrower is reviewed at least once in a year. The Bank uses the credit ratings for deciding the interest rates on borrowal accounts. The advantage of credit rating is that it enables to rank different proposals and to do meaningful comparison.

With the view to migrate to advanced approaches in credit risk, the Bank has implemented the system driven rating using web based rating model solutions (RAM CRRM & CRESS) acquired from M/s.Crisil Risk & Infrastructure solutions Ltd.

The bank follows a well-defined multi layered discretionary power structure for sanction of loans. New Business Group (NBG) has been constituted at HO for considering in-principle approval for taking up fresh credit proposals above a specified cut-off.

Credit Risk Management Policies:

The Bank has put in place a well-structured Credit Risk Management Policy duly approved by the Bank's Board. The Policy document defines organization structure, roles & responsibilities and the processes whereby the Credit Risks carried out by the Bank can be identified, quantified & managed within the framework that the Bank considers consistent with its mandate and risk tolerance.

Credit Risk is monitored on a bank-wide basis and compliance with the risk limits approved by Board/Risk Management Committee of Board is ensured.

The Bank has taken earnest steps to put in place best credit risk management practices in the bank. In addition to Credit Risk Management Policy, the bank has also framed Board approved Loan Policy, Investment Policy, etc., which form integral part in monitoring Credit risk in the bank. Besides, the bank has framed a policy on Credit Risk Mitigation Techniques & Collateral Management which lays down the details of securities (both Primary and Collateral) normally accepted by the Bank and administration of such securities to protect the interest of the Bank. These securities act as mitigation against the credit risk to which the bank is exposed.

Classification of Non-Performing Assets

The Bank follows the prudential guidelines issued by the RBI on classification of non-performing assets as under,

- i) interest and/or installment of principal remain overdue for a period of more than 90 days in respect of a term loan.

- ii) the account remains 'out of order' if the outstanding balance remains continuously in excess of sanctioned limits / DP for more than 90 days in respect of Overdraft / Cash Credit (OD/CC).
- iii) the bill remains overdue for a period of more than 90 days in the case of bills purchased and discounted.
- iv) the installment of principal or interest thereon remains overdue for two crop seasons for short duration crop.
- v) the installment of principal or interest thereon remains overdue for one crop season for long duration crops.
- vi) in respect of derivative transactions, the overdue receivables representing positive mark-to-market value of a derivative contract, if these remain unpaid for a period of 90 days from the specified due date for payment.
- vii) an account where the regular / adhoc credit limits have not been reviewed / renewed within 180 days from the due date / date of adhoc sanction will be treated as NPA.

Where the interest charged during any quarter is not serviced fully within 90 days from the end of the quarter, the account is classified as non-performing. A non-performing asset ceases to generate income for the bank.

CREDIT RISK: DISCLOSURES FOR PORTFOLIOS SUBJECT TO THE STANDARDISED APPROACH

Qualitative disclosures:

a) General Principle:

In accordance with RBI guidelines, the Bank has adopted Standardized Approach of the New Capital Adequacy Framework (NCAF) for computation of capital for Credit Risk with effect from 31.03.2009. Bank has assigned risk weights to different assets classified as prescribed by the RBI for computation of capital.

External Credit Ratings:

Rating of borrowers by External Credit Rating Agencies (ECRA) assume importance in the light of guideline for implementation of the New Capital Adequacy Framework (Basel-II). Exposures on Corporate / PSEs / Primary Dealers are assigned with risk weights based on the external ratings. For this purpose, the Reserve Bank of India has permitted Banks to use the rating of the six domestic ECRAs namely (a) Credit Analysis and Research Ltd., (CARE), (b) CRISIL Ratings Ltd., (c) India Ratings and Research P Ltd., (Formerly Fitch India) (d) ICRA Ltd., (e) ACUTE Ratings and Research Limited (Formerly SMERA Ratings Ltd) and (f) INFOMERICS Valuation, Rating Pvt Ltd., (INFOMERICS) and Brickwork Ratings India Private Limited (BRICKWORK). Bank is also using the ratings of international credit rating agencies such as (a) Fitch (b) Moody's and (c) Standard & Poor's for assigning risk weights to

claims for capital adequacy purposes where the exposure can be specified as international exposure. In consideration of the above guidelines, the bank accepts the ratings assigned by all these ECRAs.

The bank has well-structured internal credit rating mechanism to evaluate the credit risk associated with a borrower and accordingly the systems are in place for taking credit decisions with regard to acceptability of proposals and level of exposures and pricing.

In case of bank's investment in particular issues of Corporate / PSEs, the issue specific rating of the approved ECRAs are reckoned and accordingly the risk weights applied after a corresponding mapping to rating scale is provided.

With regard to the coverage of exposures by external ratings as relevant for capital computation under Standardized Approach, the process is being popularized among the borrowers so as to take the benefit of capital relief available for better rating of customers.

- Rating assigned by one rating agency can be used for all the types of claims on the borrowing entity.
- Long term ratings are used for facilities with contractual maturity of one year & above.
- Short term ratings are generally applied for facilities with contractual maturity of less than one year.

Quantitative Disclosures
